

## Critical Information Summary – NBN™ Fixed Wireless & Fixed Wireless Plus (FW/FW Plus)

### Information about the service

NBN Fixed Wireless is part of the National Broadband Network which utilises radio signals from a purpose-built cellular tower to deliver a high speed broadband internet connection to your premises. Typical range of transmission is up to 14Km

### Mandatory Requirements & Availability

This service is not dependant on any existing building services. The nbn Fixed Wireless access technology is only available where nbn Fibre or Fixed Line services are not available or not planned for service. If you are not sure what nbn connection technology services your area, you can check [www.ausinternet.com.au/nbncoverage](http://www.ausinternet.com.au/nbncoverage) to see what nbn technology is available to your location. Connections are determined by two service class types.

**Service Class 5:** Your premises is within the proposed nbn Fixed Wireless serviceability area, however no nbn equipment is installed yet. The connection will require the installation of an NBN Fixed Wireless antenna typically on the roof of your home or business, with a cable connecting it to a Network Termination Device installed inside your home in a suitable location – typically on a wall in a study, office, lounge room or other location determined as suitable by an NBNC Co technician. AUS Internet will book an installation appointment for you once your order is placed.

**Service Class 6:** Your premises already has the NBN Fixed Wireless Antenna and indoor equipment already installed. We can order a service and have your service activated typically within 1-5 business days, provided your is powered on and fully functional. If a fault is detected during the activation process, a technician will be required to attend your premises to restore the fault and manually connect the service.

### Minimum Term & Billing

Our nbn fixed line services have a minimum 1 calendar month connection term. For the purpose of billing, your services will be billed monthly in advance. Your initial bill will be a pro-rata of the remaining period of the month in which your service is connected by nbn. Eg: If your normal monthly plan cost is \$79.95 and your service was connected on the 10<sup>th</sup> day of August. Your initial bill will be for the remaining 21 days of August calculated as:  $(\$79.95 / 31 \text{ days}) \times 21 \text{ days} = \$54.16$ . This bill will be issued to you on the day of connection and payable within 7 days. All following bills will be issued on the 21<sup>st</sup> day of the month, and payable before the 28<sup>th</sup> day of the month. Where a service is connected between the 21<sup>st</sup> day and last day of the month, a single bill will be issued for the pro-rata amount and the following full month in advance. In this case, payment will be due within 7 days. Services not paid by due dates will be suspended.

### Fees and Charges

New Connection setup fee	: \$0.00	BPAY	: \$2.00 per payment
Churn from another provider	: \$0.00	Direct Debit Dishonour fee	: \$15.00
Direct Debit Fee (Bank Acct)	: \$0.00	Late Payment penalty	: \$5.00 per bill overdue
Direct Debit (Credit Card)	: 2.2% surcharge		

### Disconnection of Service (Non-Payment)

Where a payment is not made by close of business on the due date, or a payment fails to be debited, and the customer has failed to rectify the balance, services will be immediately suspended, and a late payment fee may be applied. If after a further 7 days the due balance has not been paid, the account will be terminated, and customers will need to request a new connection.

## Cancellation of Services

As there is no contract with our nbn products you may cancel at any time provided you give us a minimum of 30 days' written notice of your intention to terminate the service to [sales@ausinternet.com.au](mailto:sales@ausinternet.com.au). If the minimum notice is not provided, you will still be charged for the notice period. Where you have any pre-paid amounts over the notice period, we will refund this to you within 28 days following the notice period.

## Inclusions, Exclusions, Important conditions, Limitations & Restrictions

**NBNCo supplies:** The NBN Fixed Wireless antenna, cable, wall plate and Network Termination Device. This equipment always remains the property of NBNCo and should not be removed from the premises. Standard installation is provided at no cost to the end user. NBNCo's boundary of responsibility is the Data (UNI-D) port on the Network Termination Device.

**Aus Internet:** Provides basic support to assist you in getting connected to your nbn connection and fault rectification when your service is not working. Where a fault is assumed to be outside of the Aus Internet network, and requires a visit from an NBNCo technician, the timeframe of restoration will vary dependant on factors including your location. Credit of your service may apply if the fault is determined to be outside the Aus Internet network. Credits do not automatically apply, and you must apply for a credit via email to [support@ausinternet.com.au](mailto:support@ausinternet.com.au) within 7 days of your service being restored. No credit is applicable after 7 days.

An nbn compatible router is required to connect your equipment to the service. If you do not have a router Aus Internet can supply a router to you. We have various models available for purchase. We do not provide support for routers not purchased from us, however we are more than happy to provide you with any configuration info necessary to get your router connected.

Advertised plan speeds are based on the NBN peak theoretical speed of your chosen plan. NBN Fixed Wireless will provide you with a speed up to 25Mbps. NBN Fixed Wireless Plus is a best effort product where speeds can be expected to exceed 25Mbps where network bandwidth permits. Speeds indicated are not guaranteed. Actual attainable speed will be dependent on factors including but not limited to location, signal strength, volume of traffic through the nbn network, your equipment, users and download sources.

All plans provided by Aus Internet include unlimited data allowances. A Fair Use Policy may apply if your data usage exceeds the highest average of users across the network, or we feel that your data usage adversely impacts the experience of other users of the network. Aus Internet reserve the right to terminate services that are deemed to breach the Fair Use Policy.
